

About Us:

Wolters Kluwer is a global leader in professional information services. Professionals in the areas of legal, business, tax, accounting, finance, audit, risk, compliance, and healthcare rely on Wolters Kluwer's market leading information-enabled tools and software solutions to manage their business efficiently, deliver results to their clients, and succeed in an ever more dynamic world. Wolters Kluwer combines deep domain knowledge with specialized technology. Our portfolio offers software tools coupled with content and services that customers need to make decisions with confidence. Every day, our customers make critical decisions to help save lives, improve the way we do business, build better judicial and regulatory systems. We help them get it right.

The role

Within the Wolters Kluwer FSS and FCC organization, this role focuses on building advanced Data Science and AI-driven solutions using Python, machine learning, NLP, Generative AI, Tableau/Power BI, and advanced statistical modeling to solve complex financial and compliance challenges. The position emphasizes developing intelligent systems that can analyse large-scale structured and unstructured datasets, generate predictive insights, automate decision-making workflows, and enhance enterprise-wide financial intelligence capabilities.

Key Responsibilities

1. AI-Driven Dashboards & Data Solutions

- Develop intelligent dashboards and reporting solutions using Python, Tableau/Power BI, and advanced visualization techniques.
- Build automated data pipelines and scalable reporting frameworks for real-time business insights.
- Enhance dashboards with predictive analytics, anomaly detection, and AI-driven insights.

2. Predictive Modeling & Forecasting

- Design and implement machine learning and time-series forecasting models for Revenue, Volume, Cost, and operational metrics.
- Apply statistical modeling, feature engineering, and predictive analytics to improve forecasting accuracy and business planning.

3. Business Optimization & Data Science

- Analyze financial and operational data to identify trends, risks, and optimization opportunities.
- Build predictive and prescriptive models to support strategic decision-making and business transformation initiatives.
- Conduct hypothesis testing, scenario analysis, and data-driven business case development.

4. Advanced Analytics & Data Engineering

- Perform deep exploratory data analysis (EDA), data mining, and statistical analysis on large enterprise datasets.
- Work with Data Lakes and Datamarts for data extraction, transformation, and scalable AI/ML solution development.

- Utilize Python, SQL, NLP, and Generative AI techniques for intelligent data processing and automation.

5. Cross-Functional Collaboration

- Collaborate with financial analysts, FCC stakeholders, and cross-functional teams to deliver AI-powered solutions.
- Gather feedback from stakeholders and domain experts to continuously improve analytical models and reporting systems.
- Drive data-driven decision-making and AI adoption across the organization.

Key skills required

- Pursuing a Bachelor's degree in Computer Science, Data Science, Artificial Intelligence, Analytics, Engineering, or a related quantitative field.
- Basic to intermediate proficiency in Python programming with hands-on exposure to libraries such as Pandas, NumPy, and Scikit-learn for data analysis and automation.
- Understanding of machine learning, statistical analysis, predictive modeling, and AI/ML fundamentals.
- Familiarity with data preprocessing, exploratory data analysis (EDA), and working with structured/unstructured datasets.
- Exposure to NLP, Generative AI, LLMs, or AI-driven applications is a plus.
- Knowledge of SQL, APIs, and connecting to different data sources using Python or visualization tools like Tableau/Power BI.
- Strong analytical thinking, problem-solving skills, and eagerness to learn emerging AI and data science technologies.
- Good communication and collaboration skills with the ability to work effectively in a team-oriented environment.

Travel requirements:

None

Physical Demands

Work from Pune-Kalyani Nagar office.
