EDUCATION

MIT World Peace University, Pune

B. Tech Computer Science and Engineering (AI and Data Science)

August 2023 – May 2027

CGPA: 8.14/10.0

Relevant coursework: Data Analysis, Probability & Statistics, DBMS/SQL, Machine Learning, Data Mining, Predictive Modeling

Macro Vision Academy, Burhanpur

CBSE Board – Class XII: 86.60%, Class X: 90.80%

April 2019 – March 2022

CORE SKILLS

Business Analysis: Requirements Elicitation, BRD/FRD/SRS, User Stories & Acceptance Criteria, Use-Case & Gap Analysis, Process Mapping, Requirements Traceability (RTM), Stakeholder Management, Business-Case/ROI, UAT

Data & BI: SQL (MySQL, PostgreSQL, DuckDB), Advanced Excel, Python (Pandas, NumPy), EDA, Hypothesis Testing, Power BI, Tableau, KPI Dashboards, Data Storytelling

Tools & Methodology: Agile/Scrum, Jira, Sprint Planning, Git/GitHub, UML & draw.io, FastAPI/REST APIs, MS Office

PROJECTS

VWS-Skoda Scheduling & Analytics – Industry Collaboration

Jun 2025 – Feb 2026

Client Requirements, Process Optimization & BI Reporting | Excel, Python, Pandas, SQL, Matplotlib, Seaborn

- Sole student lead on an 8-month **VW Group Academy (Skoda)** engagement with direct **client interaction**: ran requirement-elicitation sessions, documented business rules, and mapped the as-is manual scheduling process for **~1,243 annual training events** across 3 centres (Pune, Bangalore, NCR) and 50+ rooms.
- Translated those requirements into an **ETL pipeline** (parsing complex Excel calendars), a 6-tier priority-scoring model, and a constraint-based allocation engine – reaching **98.5% auto-allocation** (1,224/1,243) and **~80% less manual effort**; shipped a **BI dashboard** (KPI cards, utilization heatmaps, month/year comparisons, threshold alerts) that turned operational data into stakeholder decisions.

Verita – Financial Crime & Compliance Intelligence Platform

May 2026 – Present

Business Analysis, BI Dashboards & Decision Support | SQL, Python, Pandas, Excel, Power BI, XGBoost, SHAP, FastAPI

- Owned the full BA lifecycle for a compliance-analytics product on **284K+ real transactions**: elicited the problem, authored user stories and acceptance criteria, mapped the investigator workflow, and built a **quantified-ROI business case** that justified the build to stakeholders.
- Designed the **KPI / BI dashboard layer** – automated EDA, hypothesis-tested key findings, revenue/volume/cost **forecasting**, scenario analysis, and natural-language→SQL querying – and exposed per-case **explainable reason codes (SHAP)** so non-technical reviewers can understand and act on every flagged decision.

MissionOS – Systems Engineering & Requirements Platform

Mar 2026 – Apr 2026

Requirements Engineering, Traceability & Trade Studies | JavaScript, Vite, Canvas, Chart.js, Selenium; IEEE-830 SRS, UML

- Built a lifecycle platform around the classic **BA toolkit** – authored **IEEE-830 SRS** & UML specs, a **Requirements Traceability Matrix (RTM)**, stakeholder-influence maps, a WBS, a 5×5 **risk matrix**, and a multi-criteria **trade-study (MCDA)** decision tool – modelling 247 requirements across 6 programs with full requirement-to-subsystem traceability, validated by a 58-test Selenium suite.

BlotQuant DLM – Western-Blot Quantification & Forensics

Apr 2026 – Jun 2026

Life Sciences | Reproducible Lab Analytics | Python, PyTorch (ResNet-50), OpenCV, FastAPI, React

- Scoped a real **life-sciences** pain point – subjective, non-reproducible manual band reading and image manipulation in published Western blots – and automated protein-band densitometry (adaptive thresholding, lane segmentation, background subtraction) alongside a dual-branch **forensics** engine (ResNet-50, ELA, FFT) that flags cloning/duplication and outputs **audit-ready PDF reports** via a React + FastAPI dashboard.

Accessible Kolam & Kaleidoscope Designer – SIH 2025

Aug 2025 – Sep 2025

Accessibility-Driven Design | Smart India Hackathon | Python, Streamlit, OpenCV, scikit-image, NetworkX, SpeechRecognition, gTTS

- **SIH 2025 – Rank 63 (Top 10%)**: gathered accessibility requirements for visually-impaired users and delivered a voice-first app – the “Chitra” assistant (speech recognition + Google TTS) lets users say “draw a big circle in the centre” and have it rendered, with 6 creation modes and a CV + graph-theory (NetworkX) analysis pipeline.

WORK EXPERIENCE

Community Management and Growth Team – Intern

Sep 2023 – Nov 2023

Engineer's Cradle Pvt. Ltd.

Pune, India

- Drove cross-platform community growth across 3 channels, lifting user engagement **40%** via targeted, data-driven campaigns and **automated Excel dashboard reporting** to the founding team.

ACHIEVEMENTS & CERTIFICATIONS

- **Certifications:** Google – Advanced Data Analytics | IBM – Data Visualization with Python | Indiana University – Financial Planning. AIR 8, National Creative Olympiad.
- **Joint President**, Student Alumni Relations Society, MIT-WPU (2025–26) | **Execution Head**, RIDE 2025 tech fest (500+ attendees) – stakeholder coordination & delivery.
