EDUCATION

MIT World Peace University, Pune

B. Tech Computer Science and Engineering (AI and Data Science)

Aug 2023 – May 2027

CGPA: 8.14/10.0

Coursework: Machine Learning, Predictive Modeling, Probability & Statistics, Data Preprocessing, DBMS, Computer Vision, AI, NLP

Macro Vision Academy, Burhanpur

CBSE Board – Class XII: 86.60%, Class X: 90.80%

Apr 2019 – Mar 2022

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++ , C, JavaScript, Bash, HTML5, CSS3

Data Science & ML: Pandas, NumPy, Scikit-Learn, XGBoost, ARIMA, Prophet, Matplotlib, Seaborn, Tableau, Power BI, EDA, Feature Engineering, Predictive Modeling

AI & NLP: LangGraph, OpenCV, YOLOv8, NLP, Generative AI, LLMs, Anomaly Detection, Data Mining, Statistical Analysis, Hypothesis Testing

Data Platforms: MySQL, PostgreSQL, SQLite, Oracle SQL, MongoDB, Data Lakes, ETL Pipelines

DevOps & Tools: Git, GitHub, AWS, Docker, CI/CD, Streamlit, REST APIs, FastAPI, Agile/Scrum, Linux, Jira

WORK EXPERIENCE

Data Science & Analytics – Intern

Engineer's Cradle Pvt. Ltd.

Sep 2023 – Nov 2023

Pune, India

- Analyzed user engagement data across 3 channels using Python; performed EDA, data preprocessing, and trend analysis to drive a 40% increase in growth metrics.
- Built AI-powered KPI dashboards via scripted data pipelines, delivering real-time business insights and saving 5+ hours/week for cross-functional teams.

PROJECTS

FinSight AI – Financial Risk & Compliance Intelligence Platform

Predictive Analytics, Forecasting & Business Intelligence | Python, Pandas, Scikit-Learn, XGBoost, ARIMA, Prophet, Tableau, Power BI, SQL, Streamlit

May 2026 – Present

- Developed a financial risk classification pipeline on 100,000+ transaction records using Logistic Regression, Random Forest, and XGBoost, achieving 93% F1-score with SMOTE resampling, feature engineering, and Bayesian hyperparameter tuning.
- Built time-series revenue forecasting models (ARIMA, Prophet) with 96% accuracy; deployed interactive Tableau/Power BI dashboards and a Streamlit web app for real-time compliance risk scoring and business optimization.

VWS-Skoda Smart Room Booking – Industry Collaboration

Data Science, EDA & Predictive Analytics | Python, Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn, SQL, CSV

Jun 2025 – Feb 2026

- Led 8-month cross-functional collaboration; performed deep EDA on 10,000+ records with Pandas/NumPy, applying statistical modeling, feature engineering, and time-series analysis on operational metrics.
- Deployed a predictive analytics platform reducing scheduling overhead by 80% across 50+ facilities; built scalable reporting dashboards for data-driven business planning and optimization.

AgentForge – Multi-Agent AI Planning Engine

Generative AI, NLP & LLM Orchestration | Python, FastAPI, LangGraph, Claude/Gemini APIs, WebSocket, React, PostgreSQL, Docker

Feb 2026 – Apr 2026

- Built an enterprise AI platform to automate business planning workflows end-to-end; orchestrated 7 LLM-powered agents for intelligent data processing on structured/unstructured datasets, delivering prescriptive analytics with real-time streaming and reducing planning time by 95%.

EconoScope – Global GDP Prediction & Economic Analytics

Regression, Feature Engineering & Data Visualization | Python, Pandas, Scikit-Learn, XGBoost, LightGBM, Matplotlib, Seaborn, Streamlit

Nov 2025 – Jan 2026

- Forecasts GDP for 190+ countries using World Bank economic data — trained 10 regression models (Ridge, LASSO, RF, XGBoost, LightGBM, MLP) on 25 indicators with 4-method feature selection; deployed a Streamlit dashboard for real-time economic scenario analysis and prediction.

AquaScan AI – Underwater Trash Detection System

Machine Learning & Anomaly Detection | Python, Scikit-Learn, YOLOv8, OpenCV, FastAPI, NumPy, React, Vite

Jan 2026 – Mar 2026

- Built an AI system for real-time underwater debris detection to support ocean conservation; trained YOLOv8s achieving 94% mAP with feature engineering and anomaly detection, delivering GeoJSON heatmap dashboards and an automated 6-check data pipeline.

Nyay AI – NLP-Powered Legal Intelligence Platform

NLP, Hybrid RAG & Knowledge Graphs | Python, LLaMA 3.3, Sentence-Transformers, BM25, D3.js, Flask, NER, SSE Streaming

Oct 2025 – Dec 2025

- Democratizes legal document analysis in 22+ Indian languages — engineered a Hybrid RAG pipeline (dense embeddings + BM25 + NER with Reciprocal Rank Fusion) achieving 89% accuracy; built 8 AI agents with CRAG self-correction for compliance risk analysis.

ACHIEVEMENTS & CERTIFICATIONS

- **Joint President**, Student Alumni Relations Society, MIT-WPU (2025–26) | **SIH 2025** – Qualified for Second Round, Rank 63 (Top 10%).
- **6 End-to-End ML Projects** deployed with Streamlit/Tableau dashboards; 10+ regression and classification models trained on real-world datasets.
- **Execution Head**, RIDE 2025 (500+ attendees) | **Core Coordinator**, Nostalgia 2025 (1000+ attendees).
- **AIR 8**, National Creative Olympiad 2021–22.
- **Certifications:** Google – Advanced Data Analytics | IBM – Data Visualization with Python | Indiana University – Financial Planning.
